Siblings in Placement	SM10a30 a/b/c

Performance Measure

Tracks children in placement who have siblings to determine if siblings are placed together.

Target Population

Report includes children in an open out-of-home placement during the reporting period that are identified as siblings based on having a common parent or guardian. Parents and guardians are cross-checked to identify ½ siblings. Depending on family relationship structure, a child could be counted in more than one sibling group. Excludes children whose parent or guardian is an active worker.

National Standard

CFSR Performance Item(s)

Permanency Outcome 2, Item 12 – Placement with Siblings

Report Run Cycle

X	Annual	**X**	Quarterly	**X**	Monthly	**X**	On-Demand

Report Output

X	Statewide Summary (c report)	**X**	County/Site Summary (a report)	**X**	Case-Level Detail (a report)	**X**	All County Comparison (c report)

Key Columns in Report

Summary	1) Siblings placed with one or more siblings 2) Siblings identified as placed together on permanency plan 3) Siblings part of large groups 4) Siblings placed in special care facilities
Case-Level Detail	Excel worksheet showing case ID (Column M), child ID (Column Q), number of siblings (Column AI), number placed together (Column AJ), and provider ID (Column BB)

Other Comments/Considerations

1) The designation on the permanency plan that a child is placed with a sibling may not reflect the current placement status of children. 2) Report shows children in large sibling groups and placements in special (higher level) care facilities as context information.

Report Key – Siblings in Placement

County/Site	Calculations are grouped by County and by Site within the County. The County/Site comes from the primary assigned worker at the end of the reporting month. If no primary worker is assigned at the time of CPS Initial Assessment approval, the County/Site comes from most recent supervisory assignment at or prior to the end of the reporting month. If no supervisor is found, the County/Site comes from the most recent secondary assignment at or prior to the end of the reporting month.
Siblings in Out of Home Placement	Siblings are defined as follows and are the population for the rest of the report: - Child is in Out of Home Placement on the report date. - Child has a common mother or a common father with another child in Out of Home Placement on the report date. - Child has a common Guardian (either Guardian 1 or Guardian 2) with another child in Out of Home Placement on the report date. - Children who are 1/2 siblings may be counted as siblings on the report.
Siblings Placed with one or more Sibling	To determine if a child identified as a sibling is placed with a sibling(s), compare each child's out of home care provider to the out of home care provider of each of the child's siblings. If any of the child's siblings has the same out of home care provider as the child, the child is considered "Placed with a Sibling".
Siblings Identified as Placed Together on the Perm Plan	Children identified as Siblings who have a Permanency Plan with a "Yes" answer to the "Are all siblings that are in OHC placed together?" question on the Placement tab.
Siblings in Large Groups	Children identified as Siblings who are part of a group of four or more siblings who are all in placement on the report date. Siblings in large groups may cross cases or counties. For example, it is possible that two siblings in a group could be in a case in Dane County while three siblings in the same group could be in a case in Rock County. This would mean that the associated detail report show this sibling group as having 5 siblings, but only 2 of the siblings would appear on the Dane detail report while 3 of the siblings would appear on the Rock detail report.
Siblings in Special Care Facilities	Children identified as Siblings with a "Placement Status" of Treatment Foster Home, Residential Care Center (RCC), or Group Home on the report date.
